

CoSHH-type waste request

Thank you for enquiring about the collection and treatment of CoSHH-type waste. Powerday is licensed to deal with this waste type but requires some information in order to be able to assist you.

Please list exactly which waste types you wish us to collect for example silicone/mastic tubes, paint tins and aerosol cans.

If you have any other waste apart from those listed above, please give us a full description along with the relevant EWC code. Any data sheets would also be helpful.

Please provide us with answers to the following questions:

1. The waste producer (name, address, postcode etc)
2. The handling requirements of the waste
3. The physical state of the containers (in the case of paint tins and cans, are they empty, have they been cleaned, has the paint set etc)
4. The process giving rise to the waste (i.e. construction of houses or commercial buildings)
5. The composition of the waste (i.e. CoSHH or other chemical safety sheets (HSDS))
6. The European Waste Code and written description
7. The site's Hazardous Waste Premises Code

Please also advise which size wheeled bin you require. We offer containers in two sizes (660 or 1100 litres) both of which are red in colour, clearly labelled and lockable.

Email your responses directly to info@powerday.co.uk or ring us on 0208 960 4646.

As soon as we have received the information as requested above, we will contact you with a quotation for service.
